SKILLS

- Can do attitude
- Adaptive, Quick Learner
- Fit for team
- Professional and polite
- Strong Communication skills
- Hardworking and Smart working
- Logical and Practical
- Exceptional problem-solving and development skills
- Collect and analyze requirements and functional specifications from business and stakeholders

EDUCATION

Lambton College, Sarnia, ON, CA - Current

Computer Software and Database Development Program

Python, HTML, CSS, Javascript, jQuery, C#, Java, Project Management, Database Management with Microsoft SQL Server, Full Stack JS, DevOps

Government Engineering College, India

2015- 2018

C, C++, Algorithm, Data Structure, Microprocessor, Java, C#, Front End Technologies, Database Management, Project Management, Fundamentals of Software Engineering, Calculus, Engineering Math

PROFESSIONAL SUMMARY

- Firsthand in **developing, improving, and enhancing** Web Applications using **.Net** and **.Net Core** Platforms
- Expert in using and encouraging **Best Practices** following coding standards and taking responsibility for **clean coding**
- **Managed, optimized, and updated** code as well as database as required.
- Practical knowledge in performing **codebase migrations** for **upgrading** projects to the latest **versions**
- Hands on in **developing** and **upgrading** projects based on **Serenity Framework** based on **.Net**
- Well-versed in **OOPS** (Object Oriented Programming System) concepts such as **Abstraction, Polymorphism, Encapsulation, and Inheritance**.
- Intermediately **proficient** with configuration management tools like **GitHub**, and **Microsoft Azure**
- Performed security management for web applications by creating **Firewall** rules to access **SQL Server** on **Azure Portal**.
- Managed automated **Runbooks** creating daily loading jobs on the **Azure Portal**
- Experienced communicating with clients, **understanding, analyzing, and discussing requirements** for projects/modules
- Practical knowledge in developing Python Scripts for ETL Loads as well as Data Integrations.
- Hands-on experience in various tools and languages such as **Java, C#, Python, Selenium WebDriver, Eclipse, Visual Studio, TestNG (regression testing), Maven (regression testing), and Jenkins (continuous integration/regression testing)** to achieve automation
- Experience in developing automation scripts using a variety of **Selenium locators**, including **XPath, CSS Selectors, Link Text, Partial Link Text, Name, and Class Name**. Well-versed in handling **multiple windows** and **Pop-ups** using Selenium while automating the test scripts. Proven ability to manage and test various **frames** and **iframes** on an **HTML** page. Proficient in working with various methods of **Select class** for **choosing, deselecting, and dealing with drop-down** menus
- Practical knowledge of **functional** and **cross-browser** testing with Selenium to make sure the web application performs as intended across several browsers
- Capable of managing various source code versions using Continuous Integration tools like **Maven**, and **GIT** Subversion client

EXPERIENCE

Full Stack Developer • Alphabyte Solutions

Dec 2021 – Current

Code and Debug web applications	Feature addition
Codebase Migrations	Unit Testing
Database management	Regression Testing
Design UI structures	Smoke Testing
Deployment	Documentation
Troubleshoot	Applying logical patches
Azure server management	Written support communication
Problem Solving	Maintaining existing web application
Ensure best practices	Code optimization

Associate Software Engineer • C-Metric Solutions

2019 - 2020

Coding and debugging web applications	Maintaining and enhancing features in existing web application
Manual Testing	Ensuring best practices
Designing minimal UI structures	Reviewing and analyzing the code by other developers
Complex Problem Solving	Processing complex queries to find out equivalent simple solutions
Troubleshooting web applications	Attention to the details while development and test of the features
Unit Testing	Ensuring the previous functionalities and new features are working simultaneously
Regression Testing	Client Communications
Applying valid and logical patches	Documentation of the web application

Associate Software Engineer • TatvaSoft Solutions

2018 – 2019

Development and Testing	Troubleshooting
Adding features	Regression testing
Java Selenium Automation	Maven
TestNG	Log4j
API Testing using Postman	Continuous Integration testing
