Experienced

Employment history

Full Stack Developer
Jan 2022 – Present

Alphabyte Solutions at Toronto

- Develop and debug web applications, ensuring optimal performance and user satisfaction.
- Optimize and manage databases to enhance data integrity and security.
- Design user-friendly interfaces to improve engagement and user experience.
- Oversee application deployments for smooth and error-free releases.
- Automate recurring tasks using Azure PowerShell scripts and Task Scheduler.
- Streamline application performance through meticulous debugging and testing.
- Foster team synergy on innovative projects, driving exceptional outcomes and promoting continuous improvement.
- Elevate server reliability through strategic Azure management and automation script development, reducing manual overhead.
- Lead transformative web initiatives, integrating user-centric design with technical excellence in full-stack development.
- Architect cutting-edge web solutions, driving innovation with a balance of design and technical skills.

Associate Software Engineer
Dec 2019 – Aug 2020

C-Metric Solutions at India

- Developed and maintained software applications, resulting in improved system performance and reliability.
- Collaborated with cross-functional teams to deliver projects on time, enhancing team productivity.
- Analyzed and resolved technical issues, reducing downtime and increasing client satisfaction.
- Implemented code reviews and testing procedures, ensuring high-quality software releases.

Associate Software Engineer

Jul 2018 – Nov 2019

TatvaSoft Solutions at India

- Conducted development and testing, including the addition of new features to enhance functionality.
- Implemented Java Selenium automation and utilized TestNG for efficient test execution.
- Performed API testing using Postman to ensure reliable system interactions.
- Executed thorough troubleshooting and regression testing to identify and resolve defects.
- Utilized Maven for project management and Log4j for effective logging.
- Conducted continuous integration testing to ensure seamless integration of code changes.
